**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/597121 filed on July 12, 2006.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The information disclosure statement filed on July 12, 2006 has been considered.

### ***Drawings***

Figures 4a, 4b, 5 and 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 11210843.

JP discloses an eccentrically oscillating gear device having an internal gear (12) having pins on an inner periphery thereof, a carrier (19) rotatable relative to the gear, a pair of bearings (20A, 20B), each having a rolling element (23) and a ring body having an outer race (21) and an inner race (22) for supporting the rolling element and disposed between an outer periphery of the carrier and inner periphery of the gear, a crank shaft (abstract) freely rotatably mounted on the carrier and an external gear (14, 15) equipped with external teeth, engaged with the internal gear pins on the outer periphery thereof, fitted to a crank portion of the shaft and disposed between the pair of bearings, wherein the external gear makes an eccentric oscillating motion by rotation of the shaft so that a output is taken out from one of the internal gear and carrier (Figure 2 discloses eccentric rotation drawing), characterized in that an end face of the ring body in one of the pair of bearings is adjacent to an end of the pins and the end face regulates movement in an axial direction of the external gear (claim 2 of JP reference, see translation, discloses that the inner ring part regulates movement of the external gear in shaft orientation of the pin).

#### ***Allowable Subject Matter***

Claims 1-3 are allowed.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
